Jul 09, 2015 Thu 9 Jul 2015 04:13 EDT Last modified on Tue 21 Feb 2017 12:00 Aug 14, 2014 I have an issue where a user has a folder that was created near the end of last year.. The lone file has the proper date, but as of today, the folder it was in has the date '8/12' - the file is the same and has not been changed, and on the server side, there have been no changes.

This is a date not shown by Windows Explorer or the average windows A) Creation date: touch -t YYYYMMDDhhmm theFile
b) Modified date: touch -mt YYYYMMDDhhmm theFile Examples: touch -t 25 theFile.. File Modified: This date as shown by Windows there has been a change to the file itself.. This can export whole folders of
